Advice & services for self-employed professionals

If you are new to self-employment, we will help you to register and get set up to trade.

We'll advise you on the relevant taxes, appropriate allowances and reliefs, keeping good financial records, as well as how to invest your wealth. We'll also discuss with you the most suitable business structure for your venture.

If you are already trading, we'll review your past financial performance and give you our advice on what steps you could take to develop the business, with one eye on what your next career move could be e.g. buying into an existing business or setting up a new one.

We provide year-round service and assign a qualified accountant and tax adviser to each of our clients.

Advice & services for principals, partners and pharmacists

We'll help you to plan, and comply with your statutory obligations (accounting & tax) and advise you on how to improve the practice's financial performance.

We also provide tax, remuneration and pension planning advice to the principals, or partners of the practice, to ensure they are maximising the tax reliefs and allowances (business & personal) available to them and their business profits are invested wisely.

When it comes to selling or passing on the practice, we advise on the most suitable succession and/or retirement or practice sale strategy.

On the flip side, if the practice is considering a merger, or buying another practice, we'll advise on the most tax-efficient options and the sources of finance that are available to fund the deal.
